<p>The CNT > Halogen Free < Made in E.U.</p> <p>Our latest contribution to the always interesting world of recording and replay is our Carbon Nano Tube based interconnect: The CNT. Carbon Nano Tube is the most advanced conductor material at the moment available and exclusively used in our The CNT. We are proud to announce that we are the first company worldwide to have a high-tech & commercial application of this very advanced type of carbon. The sound quality is unsurpassed with all the properties an audiophile could dream about, like a very spacious, very dynamic and very transparent sound without any harshness. Listening gives you the feeling you are in front of the real soundstage.</p> <p>Not available on reels, due to the complex mounting process.</p> <p>Mounted with rhodium plated RCA or silver plated Neutrik XLR balanced connectors. <p>The Platinum Hybrid Mk II Balanced > Halogen Free < Made in E.U.</p> <p>Very limited-edition high quality balanced interconnect with extremely purified platinum(!) signal conductors with improved platinum coloured HULLIFLEX®(*) High Density jacket. With our vast knowledge on metal technology we have started by calculating the ideal specifications of the conductors and matched the type of metal that possessed these numbers. It turned out that two 0.3 mm solid core pure platinum conductors were right on the dot. The impedance between two natural conductors is a very precise 110Ω. The result is thus not only a very attractive looking cable but also probably the best metal based balanced interconnect on the market today. After our very successful introduction of the Platinum Hybrid MK I, we have been looking at any possible improvement, which we realised in a lower capacitance conductor with an improved thicker jacket.</p> <p>Not available on reels, due to the complex mounting process.</p> <p>Mounted with rhodium plated C - 11.3 (RCA) or silver plated Neutrik XLR balanced connectors. Packed in a beautiful aluminium wallet.</p>

5.2 Coaxial interlinks

Stereo pair 3T The River Hybrid > Halogen Free < Made in E.U.			
Our coaxial entry level interconnect model with both centre core and shielding made of 3T conductors. The centre conductor is made of 19 strands of 150-micron diameter each. In combination with the extra L.S.C. layer around the centre core, we have applied two very innovative technologies together to open doors to the highest quality in musical experiences.			
The shielding is made of 40 3T strands combined with 2 layers of multiple heavy silver coated high quality copper strands. Our exclusive 3T technology gives a much higher resolution and richer detail, compared to any other metal technology used so far.			
Mounted rhodium plated C - 7.3 (RCA) connectors.			
0.8m RCA – RCA	EUR		329,00
1.0m RCA – RCA	EUR		359,00
1.2m RCA – RCA	EUR		389,00

Stereo pair 3T The Sea Hybrid > Halogen Free < Made in E.U.			
Our second 3T coaxial interconnect with technical upgrades compared to the 3T River Hybrid. The single Hybrid centre conductor is made of a thicker 3T single strand conductor with 400-micron diameter and coated with an L.S.C. layer to improve the signal quality. The shielding has beside 40 3T strands 2 layers of multiple heavy silver coated high quality copper strands.			
The dynamic sound character combined with the very high resolution will be a very big surprise to you.			
All our combined and innovative 3T technology contributes to a very natural sound reproduction never experienced before.

IMPORTANT NOTICE

Our speaker cables are sold either factory-terminated or, mostly, on reels. Depending on the size of the cable these reels contain usually either 50, 100- or 200-meter lengths.

Unfortunately, we do not live in a perfect world. For this reason, there are always a few non-regular lengths in a production run due to e.g. cut-outs during quality control, printing problems, etc.

For this reason, we behold the right to deliver (and charge) lengths with a tolerance in length of plus or minus 5% (five percent) of the standard configuration as mentioned in the price list.

Lengths that have a greater variation are offered at a discount. A list of available types and lengths with discount is to be found at the representative section of our website.

12.2 Amplifier electronics

The Emerald pre-amplifier > Made in E.U. <

The Emerald balanced preamplifier is the next logic step after the introduction of The Grail SB.

We have used the same design ideas from our Grail SB, a remote control is part of the design and the housing is made of thick steel. Specifically, the very natural and specific spacious sound is a benchmark of The Emerald. The very high resolution in combination with the natural dynamics in replay is another remarkable property.

13. Miscellaneous

			Advisory retail price
The Link			
Many amplifiers and A/V Receivers are equipped with a separate pre- and power amplifier part because of the extra opportunities such a separation offers, such as connecting a subwoofer or extra amplifiers. Connect those parts with The Link and you will immediately hear sound improvement. The sound reproduction will spectacularly gain air, detail and dynamic. Length 15 cm, colour red. Terminated with 4 gold-plated C-4.0 (RCA) connectors.			
Price per set	EUR		56,40

The Polarity Checker			
Helps to enhance your audio system's resolution by minimising its residual ground currents. Supplied with operating manual.			
Price per unit	EUR		29,60

The Solution - Made in E.U.			
The Solution fluid is a very stable completely non-chemical product which protects the metal of connectors or cables for a long time against chemical deterioration. Supplied in a 25cc bottle.

Pss Pss reconditioning spray – Made in E.U.			
Aerosol contained spray which cleans oxidized contacts and also loosens and removes the film that is often composed by microscopic particles which have been transported by the polluted air surrounding the equipment or objects. The spray not only cleans but also protects the cleaned parts afterwards.			
Only available for shipment by road transport, due to security regulations.			
Price per can	EUR		20,00

Lead-free Silver Solder - Made in E.U.			
The strict order in the EU to work without any lead containing solder for environmental reasons combined with our ideas about improved metal technology are the basis for this product: the Sn95 / Ag4 Lead free Silver Solder. Direct sound quality comparisons between the two types of solder showed immediately the higher quality of our Lead-Free Silver Solder. The actual silver content is 4.5%.

<p>Jeroen de Rijk & friends: Central Heating The purpose of this CD was to record the balance in music and acoustics between Jeroen de Rijk - Percussionist and ten of his best friends, each of them performing on another instrument. Especially the performance of the numbers Masquerade, Self-portrait and Tarmac are perfect examples of a good balance between music and acoustics. They can be used as excellent demo numbers for critical listeners to evaluate their hi-fi system.</p>			
<p>Louis van Dijk: I could have danced all night Louis at his best with music he hasn't played for years. For those who also intend to use this CD as a test-medium, all numbers are suitable toppers. Great acoustics and even better music.</p>			
<p>A sounds impression Contains two tracks from each CD within our first release.</p>			
<p>Frits Landesbergen Big Band: The Old Fashioned Way A nice spacious, good harmony and great sounding big band with surprising instrument combinations. A lot of playing experience is captured here. For sure you will like the sound because it reminds also to the 60's and the 70's. The sound is too good to let it just fade out and disappear.</p>			
<p>Louis van Dijk: I could have danced all night Louis at his best with music he hasn't played for years. For those who also intend to use this CD as a test-medium, all numbers are suitable toppers. Great acoustics and even better music.</p>
